

Ballarat Mini Conference

248 Wickham Rd
Highett 3190
www.sarc.com.au
(03) 9532 5261

I seem to have collapsed!

Join us for a free mini-conference event you won't want to miss. In a refreshingly new format, we will review collapse from two completely different angles in a quickfire presentation filled with useful tips for your clinic. Here's what we'll be covering:

Cardiology - Cardiac collapse

Richard will review causes of collapse due to cardiac disease. Richard will use case examples, including how to differentiate between syncope, seizures and episodic weakness.

Emergency - Haemabdomen

A common emergency is the collapsed patient. Raquel will briefly touch on the basics of stabilisation, including fluid therapy, then the quick and easy tools you can use to assess the cause of collapse. We will focus on haemabdomen - how to work out what is happening, what you can do and what to tell the client.

When: Sunday 10th October 2010, 12noon-3pm

Where: Mercure Hotel & Convention Centre - 613 Main Rd, Ballarat

Cardiology

Dr Richard Woolley

Specialist - Veterinary Cardiology

Cardiac collapse

Emergency

Dr Raquel Newman

Emergency and Critical Care

Haemabdomen

We would like to thank Pfizer and Provet for their generous support of this event.
